

Clienta

Customer Service • Customer Success • Support Automation

**All-in-one platform to manage customer relationships,
support tickets, and drive retention.**

www.clienta.com

What is Clienta?

Clienta is a modern, multi-tenant SaaS CRM platform built for customer service and success teams. It provides everything you need to manage customer relationships, resolve support issues faster, and drive long-term retention — all from a single, beautiful dashboard.

Whether you're a startup or an enterprise, Clienta scales with your business. Each tenant gets their own isolated workspace with configurable features, custom branding, and granular role-based access control.

Multi-Tenant Architecture

Each customer gets their own isolated workspace with independent data, users, and settings.

Role-Based Access Control

50+ granular permissions across 15 modules — control exactly who sees what.

White-Label Ready

Custom branding, logos, colors, and embeddable chat widget for each tenant.

Core CRM Features

Accounts & Contacts

Manage B2B accounts with health scores, usage metrics, subscriptions, invoices, and contacts.

Tickets

Full support ticketing with SLA tracking, priority, categories, departments, assignments, and timelines.

Deals Pipeline

Track sales opportunities through lead !' qualified !' proposal !' negotiation !' won/lost stages.

Unified Inbox

All conversations from email, chat, WhatsApp, SMS, and social media in one place.

Knowledge Base

Self-service articles with categories, visibility control, and portal access for customers.

Embeddable Chat Widget

Clienta includes a fully-featured, embeddable chat widget that can be added to any website with a single script tag. It's packed with 30+ configuration options and can be customized to match each tenant's brand.

Pre-Chat Form

Collect visitor name, email, and phone before starting a conversation.

Proactive Messages

Auto-open the widget after a delay or show targeted messages on specific pages.

Working Hours & Offline Mode

Show offline message outside business hours with a ticket form for follow-up.

Bot Auto-Reply

Instant automated responses while agents are busy or offline.

Typing Indicators & Read Receipts

Real-time engagement signals for visitors and agents.

Emoji, Ratings & Satisfaction Surveys

Post-chat rating and satisfaction survey built in.

SaaS Operations

Incident Management

Track, triage, and resolve incidents with severity levels and affected account tracking.

Bug Tracking

Log and manage bugs with severity, status workflow, and product linkage.

Feature Requests

Customer-driven feature voting with prioritization and status tracking.

Renewals & Churn Prevention

Track renewal dates, churn risk scores, and at-risk revenue.

CSAT & NPS Surveys

Post-ticket CSAT and account-level NPS with trend analysis.

SLA Engine

Configurable SLA policies with response time, resolution time, and escalation tracking.

Reports & Analytics

Clienta provides a comprehensive reporting dashboard with 8 key performance indicators, breakdown charts by status, priority, channel, department, and assignee, plus CSV export for deeper analysis.

KPI Dashboard

Open tickets, avg first response, SLA compliance, MRR, health scores, and more.

Breakdown Charts

Visual breakdowns by status, priority, source channel, department, and assignee.

Monthly Trends

Track ticket volume trends over the last 6 months.

CSV Export

Export reports to CSV for analysis in Excel, Google Sheets, or BI tools.

Account Health Scoring

Automated health scores with event history and trend tracking.

Platform & Administration

Multi-Portal Login

Separate login pages for platform admins, tenant staff, and customer portal users.

Feature Flags

Enable or disable 15 modules per tenant — sell different tiers without code changes.

Custom Fields

6 field types (text, number, date, boolean, select, multi-select) per entity.

Audit Logs

Full audit trail of who changed what, when, across all entities.

i18n Support

English and Arabic out of the box, with RTL layout support.

Email Templates

Configurable email templates for notifications and communications.

Why Choose Clienta?

Modern Tech Stack

Built with Next.js 16, Supabase, and TypeScript — fast, type-safe, and scalable.

Multi-Tenant from Day One

Isolated data, per-tenant branding, and feature gating built into the architecture.

Ready to Sell

Feature flags, tenant management, and pricing tiers — launch your SaaS immediately.

Beautiful UI

Clean, responsive design with dark mode, keyboard shortcuts, and command palette.

Self-Service Portal

Customers can submit tickets, browse the knowledge base, and track their requests.

Open & Extensible

REST APIs, webhooks, custom fields, and email templates — integrate with anything.

Get Started with Clienta

Launch your customer service platform today.
Scalable. Customizable. Ready to sell.
