

Clienta

Your Unified Customer Operations Platform

Support · Success · Billing · Incidents · Insights — all in one place

Welcome to your tenant workspace

What is Clienta?

Clienta is a multi-tenant CRM platform built for B2B SaaS companies — unifying customer service, success operations, billing visibility, incident management, and account health monitoring into a single system.

Internal Dashboard

Your team's command center: accounts, tickets, inbox, incidents, reports and more.

Customer Portal

Self-service for your customers: submit tickets, browse the KB, view billing, take surveys.

Chat Widget

A customizable, embeddable live-chat widget for your website — one script tag to deploy.

Why Clienta? — Key Benefits

Unified Operations

Replace multiple tools with one platform for tickets, accounts, deals, incidents, bugs, renewals and knowledge.

Omni-Channel Support

Answer customers on Email, Phone/VoIP, WhatsApp, Facebook, Instagram, SMS, Telegram, Web Chat and API.

Enterprise-Grade Security

Role-based access with 10 roles and 50+ permissions, enforced at both UI and database (RLS) levels.

Fully Brandable

Customize the widget, portal and colors; set working hours, probes and offline messaging.

Bilingual (EN/AR)

Complete English and Arabic support with automatic RTL layout switching.

Real-Time Collaboration

Live in-app notifications and real-time messaging keep your team and customers in sync.

Powerful Modules for Your Team

Explore these modules from your sidebar — each is configurable to how you work.

Dashboard	Accounts	Contacts	Deals
Tickets	Unified Inbox	Incidents	Bugs
Feature Requests	Renewals	Knowledge Base	Surveys
Reports	Tasks	Notifications	Settings

Ticketing, SLA & Omni-Channel Inbox

- **Full ticketing workflow** statuses, priorities, assignment, categories, custom fields
- **SLA engine** automated tracking, escalation and compliance monitoring
- **Conversation threads** with internal notes for handoffs between agents
- **Unified Inbox** Email · VoIP phone · WhatsApp · Facebook · Instagram · SMS · Telegram · Web Chat · API
- **Rich messaging** attachments, voice notes, emoji, canned replies, typing indicators
- **Task automation** follow-ups linked to accounts, tickets, incidents and renewals

Every interaction in one place

Your agents no longer switch between tools. Customer context travels with the conversation — account, contact, history, SLA and health status — so every response is informed and consistent.

Account Management & Customer Success

- **360° company profiles** contacts, tickets, activity timeline, notes, custom fields
- **Account health scores** proactively spot at-risk accounts before they churn
- **Usage & billing visibility** MRR tracking and linked subscription details
- **Contact roles** Decision Maker, Billing, Technical, End User
- **Deals & pipeline** manage prospects from Lead through Won/Lost
- **Renewals & churn risk** track contract renewals and mitigation actions

Stay ahead of churn

Health scoring and renewal tracking give your customer success team the early signals they need to intervene, retain revenue and grow your accounts.

Customer Self-Service Portal

My Tickets

Customers submit, view and follow their support tickets anytime.

Knowledge Base

Self-serve answers 24/7, reducing ticket volume.

My Account

View billing and subscription details in one place.

Surveys

Share feedback through CSAT and NPS surveys.

Profile

Manage communication preferences and personal details.

Embeddable Live-Chat Widget

Real-time messaging

typing indicators & read receipts

Files & voice

up to 5 files / 10MB, voice recording

Bot & answers

auto-reply, proactive & canned replies

Working hours

auto offline mode + offline lead capture

5 languages

English • Spanish • French • Arabic • German

Deploy with a single `<script>` tag — no complex installation.

30+ options

colors, position, size, custom CSS

Insights, Reports & Continuous Improvement

- **8+ key KPIs** open tickets, SLA compliance, MRR, health, incidents, agent performance
- **Breakdowns** by status, priority, channel, department and assignee
- **Monthly trends** spot patterns and measure improvement over time
- **CSV export** pull data for your own analysis and dashboards
- **Agent & team reports** measure performance and balance workloads
- **Feature requests & votes** let customers shape your roadmap

Measure. Improve. Grow.

Clienta turns everyday operations into actionable insight, so you can close more tickets, raise satisfaction and grow revenue with confidence.

Administration, Customization & Security

- **Users, roles & permissions** 10 predefined roles and 50+ granular permissions
- **Teams & departments** organize your people into specialized workflows
- **SLA policies** tailor service level agreements to how you operate
- **Email templates & custom fields** standardize communication and capture your own data
- **Audit logs** complete change history for compliance and security
- **Feature flags** toggle 15 modules per your plan — tickets, inbox, chat, portal and more
- **Data isolation** row-level security guarantees your data stays yours

Getting Started

1

Login

Sign in to your tenant dashboard at your assigned URL.

2

Configure

Set up users, roles, teams, categories and SLA policies.

3

Brand

Customize the widget and portal to match your company.

4

Import

Add accounts, contacts, products and knowledge base articles.

5

Connect

Link email, phone and social channels into the Unified Inbox.

6

Go live

Embed the chat widget and launch your portal.

Welcome to Clienta

One platform. Every customer conversation. Real results.

To get started or for training, contact your platform administrator.
